

ACEP: Community Meeting #2

S. Burnett & Associates Limited has been working with Moose Deer Point First Nation on the Moose Deer Point First Nation Community Energy Plan project. The project is funded by the Independent Electricity System Operator (IESO) through the Aboriginal Community Energy Plan (ACEP) program. A community energy plan is a long-term community plan to improve energy efficiency, reduce electricity consumption, and assess opportunities for green energy solutions.

Identify ways to improve energy efficiency and reduce electricity consumption

Evaluate options for green energy solutions

Manage energy costs for the community and its members

At this time we would like to notify the community about an upcoming Community Meeting #2 to be scheduled for 6:00pm on July 18th, 2017

This community meeting will highlight the results of the project so far. Energy saving tips and tricks will also be shared as well as coupons for energy efficient products. Knowing this can help you save and reduce energy consumption in the future! **Door prizes and refreshments will be provided.**

If you have any questions and please do not hesitate to call Peter Luce or Dillon Bickell at (705) 329-2959 or e-mail Dillon at dillon.bickell@sbaengineering.com
